## Sign Permit Application

Engineering Department: 1200 18<sup>th</sup> Street, Hood River, OR 97031 Phone: 541-387-5201

## City of Hood River Sign Permitting REQUIRED DOCUMENTS CHECKLIST FOR APPLICATION SUBMITTAL:

Along with this 3-page form, EVERY sign permit application must have a to-scale diagram with the following:

- Proposed sign(s)
- All existing signs present at the site
- Dimensions of all signs (proposed and existing)
- Dimensions of building face housing the proposed sign

**\*If your sign requires a Structural Building Permit please provide the following additional material:** (two copies of each)

- Detailed site plan showing location(s) of new and existing signs, utilities, property lines, and easements
- Complete construction plans showing elevations, sign size, heights above grade (top & bottom), poles, footing(s), spacing, material of sign, building attachment details, etc.
- Demonstrate sign meets wind and seismic requirements, provide engineering if required

**Sign installation is to be completed within 180 days of the date permit is issued.**

### To schedule required inspections:

Engineering Inspection - Call: (541) 387-5201

Building Inspection - Online: [BuildingPermits.Oregon.gov](http://BuildingPermits.Oregon.gov)

Call: (541) 387-5211

**I hereby acknowledge that the information given is correct and that all work will be in conformance with the approved plans, applicable codes, conditions of approval and rules of the City of Hood River. I will call for required inspections.**

## Sign Permit Application

Engineering Department: 1200 18<sup>th</sup> Street, Hood River, OR 97031 Phone: 541-387-5201

The following information must be provided before an application for a sign permit can be considered.  
 A free-standing sign will also require a site plan.  
 Provide diagrams of your business and each business sign, using the following guidelines.

### 1. Area of Face

[Exclude gable and mansard roofs or false fronts.]

$$A \times B = \text{Area of Face}$$

$$(A \times B) + (1/2 B \times C) = \text{Area of Face}$$

The total area of signs permitted your business by the sign code is 8% of the area of the business face.  
 $\text{Area of Face} \times .08 = \text{Maximum Area of Signs}$

### 2. Area of Signs

- Include diagrams of existing signs you intend to keep as well as the new signs for which you are applying.
- Identify a sign diagram existing or new, electric or not, and the type [wall, pole, etc.].
- Generally, a business can have 3 signs, no more than 2 on one face and no more than 1 free-standing.  
 [Refer to City of Hood River Sign Ordinance.]

In this example:

Area of Face for the front =  $12 \times 30 = 360$  sqft  
 Area of Signs for primary face =  $360 \times .08 = 28$  sqft  
 Area of Face for the side =  $12 \times 40 = 480$  sqft  
 Area of Signs for secondary face =  $480 \times .04 = 19$  sqft

Sign A is an existing sign  $8 \times 1 = 8$  sqft  
 Sign B is an existing sign  $8 \times 1 = 8$  sqft  
 Sign C is the proposed new sign, a double-sided pole sign with two parts  $3 \times 1$  and  $6 \times 1$  totaling 9 sqft/side or 18 sqft total

Sign A + Sign C is  $8 + 18 = 26$  sqft < 8% of primary  
 Sign B is 8 sqft which is < 4% of secondary face

Sign C would be OK.
